Coffee w. Candidate Plan and Essential Questions
Appreciation for meeting or specific action the candidate has taken
Introduction of CCL (non-profit, volunteer, 190,000, international, etc) and advocacy for Carbon, Fee and Dividend
How urgent do you consider climate change is to Arizonans? Specifically: water, temperature, wildfires, diseases, ecosystem damage, people's health and the economy?
How are you proposing we can address the above threats most effectively?
Are you familiar with the most common methods of carbon pricing – cap and trade, and carbon fee and dividend? If not, may I tell you how they work? What specific solutions to climate change, such as carbon capture, cap and trade, or carbon pricing have you considered?

Are you including climate change solutions on your website and campaign literature?
Would you be interested in joining a climate solutions forum at Tucson CCL's meeting Sept. 12th?
Would you be willing to join us in talking with a member of Congress about H.R. 763?

NOTETAKER - Please circle the attitude described in the box below that best describes this candidate, and mail results to janeconlin5@gmail.com. Also, please contact me for information you need to follow-up. Thank you!!

Knowledgeable about climate change. Will seek solutions and offers to help us.	Some knowledge but will not take pro-active steps.	Not sure about science or fears solutions may harm economy.
What's our next step?	What studies, polls, information can we provide?	Would this person be interested in learning more?
